

Green Power

↗ Balance

- when you prioritise renewable energy

Thank you for choosing renewable energy

You have chosen Green Power Balance in addition to your electricity agreement which means that your consumption will be covered 100 % by electricity from solar parks or wind turbines which have been built without any subsidies.

Your purchase includes guarantees of origin that correspond to your consumption. This ensures that the amount of electricity used by your company is covered using energy from renewable sources. Furthermore, Energi Danmark ensures that the your consumption is matched with production from solar parks or wind turbines on a monthly basis.

If you buy guarantees of origin that correspond to the entire electricity consumption of your company, your company can call itself carbon neutral.

Energy sources used in the production of electricity

Your company has bought electricity from solar parks or wind turbines, owned by Energi Danmarks business partners, and built without any subsidies.

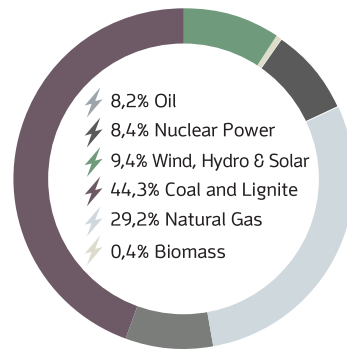

The electricity declarations for solar energy, wind power and general electricity can be found below. The calculations are based on guidelines issued by Energinet.dk.

Your individual electricity declaration
Emission of CO₂: 0 g/kWh

Your individual electricity declaration
Emission of CO₂: 0 g/kWh

The 2023 General Electricity Declaration
Emission of CO₂: 489 g/kWh

Proof of purchase of Green Power Balance

Green Power Balance ensures that the guarantees of origin for renewable energy originate from solar parks and wind turbines built without subsidies and owned by Energi Danmark's business partners.

In connection with the auditing of the financial statements, Energi Danmark A/S's auditor, PwC, documents the balance between the amount of electricity that is purchased and sold.

Company name	Address	Post code	City
A. Johnsen Industri A/S	Farum Gydevej 67	3520	Farum

Energi Danmark A/S hereby confirms that A. Johnsen Industri A/S has purchased its percentage of electricity consumption as Green Power Balance produced at solar parks or wind turbines built without subsidies in the period between 01.01.2025 - 31.12.2026
